During the performance of this contract, the contractor agrees as follows:

1. The contractor shall not discriminate against any employee or applicant for employment because of race, religion, color, sex or national origin. As used herein, the word "treated" shall mean and include without limitation the following: recruited, whether by advertising or other means; compensation, whether in the form of rates or pay or other forms of compensation; selected for training, including apprenticeship; promoted; demoted; upgraded; downgraded; transferred; laid off; and terminated. Provided, however, that in the event the contractor becomes involved in or is threatened with litigation as the result of such direction by the City, the City will enter into such litigation as is necessary to protect the interests of the City and to effectuate the City's Equal Opportunity Program and, in the case of contracts receiving Federal assistance, the contractor or the City may request the United States to enter into such litigation to protect the interests of the United States.

6. The contractor shall file and shall cause his subcontractors, if any, to file compliance reports with the City in the form and to the extent prescribed by the City or its representative. Compliance reports filed at such times as directed shall contain information as to the employment practices, policies, programs and statistics of the contractor and his subcontractors.

7. The contractor shall include the provisions of this Equal Employment Opportunity Clause

Large and Critical Valve Evaluation,
Improvement and Information Program

MINORITY CONTRACT PROVISIONS: MINORITY BUSINESS ENTERPRISE UTILIZATION COMMITMENT

A. The Bidder agrees to expend at least $ _____ of the contract if awarded for minority business enterprises. For purposes of this pledge, the term "minority business enterprise" means a business at least 50 percent of which is owned by minority group members or, in case of a publicly owned business, at least 51 percent of the stock of which is owned by minority group members. For the purposes of the preceding sentence, minority members are citizens of the United States who are African Americans, Spanish-Speaking, Orientals, American Indians, Eskimos, Aleuts or Females. Minority business enterprises may be employed as construction subcontractors or asvendors or suppliers. The Bidder must indicate the minority business enterprises it intends to utilize in this document as follows:

NAME AND ADDRESS OF MINORITY FIRMS	NATURE OF PARTICIPATION	DOLLAR VALUE OF PARTICIPATION
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Total Bid Amount: _____ Total: _____

Percentage of Minority Participation _____%

B. The Bidder agrees to furnish implementation reports to indicate the minority business enterprises which it has or intends to utilize. The first report is due five (5) days after notification to the lowest and best bidder. The second report is due at 40% completion.

C. It is the goal of the City of Canton that at least ten percent (10%) of the total of all contracts be expended for bonafide minority business enterprises.

D. If the ten percent (10%) minority business utilization cannot be met, a waiver can be granted by the Board of Control upon recommendation of the Director of Public Service and/or Safety. To justify a waiver, it must be shown that every feasible attempt has been made to comply, and it must be demonstrated that sufficient, relevant, qualified minority business enterprises (which can perform subcontracts or furnish supplies) are unavailable in the market area of the project to enable meeting the ten percent (10%) minority business enterprise goal.

E. Failure to comply with the Minority Business Enterprise Utilization Commitment will not be grounds for the forfeiture of a bid bond so long as a "best effort" approach to comply with such commitment can be demonstrated. If such compliance cannot be obtained, the bidder shall furnish written evidence to justify that he has made "best efforts" to comply with the Minority Business Enterprise Assistance Program. A representative of the City of Canton will monitor and determine whether or not a good faith effort to comply with the Minority Business Enterprise Commitment has been made.

F. In light of the above, the Board of Control will still award the contract to the lowest and best bidder. Breach of this commitment constitutes breach of the Bidder's contract, if awarded.

G. The undersigned hereby certifies that he or she has read the terms of the commitment and is authorized to bind the Bidder to the commitment herein set forth.

ORDINANCE NO. 86/2009

AN ORDINANCE AMENDING CHAPTER 105, CONTRACTS, OF TITLE ONE - GENERAL PROVISIONS OF THE CODIFIED ORDINANCES OF THE CITY OF CANTON

WHEREAS, throughout the United States, private and public construction users have regularly utilized and required project labor agreements to establish uniform terms and conditions of employment for contractors and craft construction employees; and, project labor agreements have been shown to provide an effective mechanism for overall construction project staffing, planning and labor stability on job sites; and

WHEREAS, uniformity of terms and conditions and efficient administration of public works is especially needed given the current levels of unemployment generally, and more profoundly in the construction industry; and

WHEREAS, the City has determined that the continued growth and health of the construction industry in the city of Canton and Stark County is vital to the growth and stability of the general economy of the city of Canton; and

WHEREAS, project labor agreements are legal under federal and Ohio law, have been successfully utilized on a large number of major public improvement projects throughout the United States, and neither union nor non-union contractors and employees are precluded from competitively bidding or working under project labor agreements; and

WHEREAS, in order to provide for project labor agreements with the East Central Ohio Building and Construction Trades Council, AFL-CIO and its affiliated local unions for construction projects undertaken by the city of Canton, amendments are required to Chapter 105, Contracts, of the Codified Ordinances;

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF CANTON, STATE OF OHIO, THAT:

Section 1. Section 105.01, Procedures to Determine Lowest and Best Bid for Construction of Public Improvements, of the Codified Ordinances is amended to read as follows:

105.01 CONSTRUCTION CONTRACTS.

(a) Definitions.

For purposes of this chapter, the following definitions shall apply:

(1) "Public Contract" or "Construction Project" means either of the following:

A. Any new construction of any public improvement, the total overall project cost of which is estimated to be more than

**AMENDED $100,000.00 ~~$50,000.00~~ and performed by other than full-time employees of the City who have completed their probationary periods in the classified service. Determination of project cost shall be subject to the biennial increase or decrease provided for by Ohio R.C. 4115.034; or

B. Any construction, reconstruction, improvement, enlargement, renovation, alteration, repair, painting or decorating of any public improvement, which is estimated to be more than $20,000.00 and performed by other than full-time employees of the City who have completed their probationary periods in the classified service. Determination of project cost shall be subject to the biennial increase or decrease provided for by Ohio R.C. 4115.034.

(2) "Public improvement" includes all buildings, roads, streets, alleys, sewers, ditches, sewage disposal plants, water works and all other structures or works constructed by the City or by any person or entity, who, pursuant to a contract with the City, constructs any public improvement for the City. A public improvement shall be considered as one project where a review of the nature, scope and objective, as well as the interrelationship of time and purpose of the project, evidences the undertaking of a single public improvement pursuant to Ohio R.C. 4115.033 and O.A.C. 4101:9-4-17.

(3) "Local employee" means:

A. A person residing within the City of Canton or Stark County;

B. A person working for a contractor or from a pool of labor located within the City of Canton or Stark County; or

C. Due to the specialty nature of the employment to be performed, where a suitable person meeting either subsection (a)(3)A. or B. hereof is not available, a person residing or working within a location as close to Canton as is available. A "suitable person" means a person who is qualified to perform the work or trainable within a reasonable period of time.

(b) Project Labor Agreements.

(1) In connection with the public bidding and contract awarding process for every proposed public contract or construction project, the Mayor, or his designee, shall evaluate whether a project labor agreement will advance the City's procurement interest in cost, efficiency, and quality while promoting labor-management stability as well as compliance with applicable legal requirements governing safety and health, equal employment opportunity, labor and employment standards, and other related matters.

(2) If the Mayor, or his designee, determines that a project labor agreement will serve the goals set forth above, the Mayor, or his designee, shall negotiate a project labor agreement with the East Central Ohio Building and Construction Trades Council and its affiliated local unions, or said Council's successor.

(3) The bidding documents for each such construction project shall contain a written provision requiring the successful bidder to comply with and adhere to all of the provisions of any project labor agreement negotiated by the Mayor for the project.

(4) The City shall not thereafter enter into any contract with the successful bidder for the construction of any such city building unless the contract contains a provision requiring the successful bidder, and all of the bidder's contractors and subcontractors, to comply with and adhere to the provisions of the negotiated project labor agreement.

(5) If the Mayor, or his designee, with respect to any proposed construction project, determines that a project labor agreement will not serve the goals set forth in subsection (b)(1), the Mayor shall submit a written report to the Clerk of Council that shall state the reasons for concluding that a project labor agreement for the project will not substantially further the purposes of this section.

(c) Bids and Required Bidder Information.

(e) All bid invitations and specifications for construction, repair and renovation work shall advise prospective bidders of all of the factors that will be taken into consideration by the Board of Control in determining whether a bid is not only the lowest but the "best" bid. Bid specifications shall contain provisions conforming to this chapter, including a form or forms to enable a bidder to provide evidence to the Board of Control of the bidder's compliance with, adherence to, or satisfaction of, the various factors that shall be considered by the Board in determining the lowest and best bid.

A. SCOPE OF SERVICES

Scope of Services

Large and Critical Valve Evaluation, Improvement and Information Program

1.0 GENERAL

1.1 Overall Summary
The City of Canton Water Department, also referred to as the Water Department, desires to initiate this agreement for a Large and Critical Water Valve Evaluation, Improvement and Information Program which serves three primary purposes:

- Evaluate and improve the operability of large, 12" and larger, and critical valves in the water distribution system through hands on field activities.
- Document, integrate and analyze locational, operational and physical information of these valves in the water distribution system.
- Define and refine the scope and value of an ongoing system wide asset management program through consulting activities.

Further, all data will be delivered to the City of Canton Water Department in a format compatible with the Water Department's existing data schema.

1.2 Program Description
The City of Canton Water Department desires the service provider to develop, plan and execute a Large and Critical Valve Evaluation, Improvement and Information Program. This program will include the following activities: locate, identify, access, clean out, inspect, exercise, mark, perform minor repairs, record mapping grade GPS data, document physical and operational attribute characteristics, create a deliverable database, create work orders and analyze the results of the Program to provide consulting for the development of an ongoing valve asset management strategy for the City of Canton water distribution system.

2.0 SPECIFIC FUNCTIONS OF THE SERVICE PROVIDER

2.1 Locate the Valve
The City of Canton Water Department will provide the service provider with a minimum of two copies of the City of Canton's most current water distribution maps for the project area. Within the project area, the service provider will locate all large water distribution valves 12" and larger using the following guidelines:

- The service provider will search for all valves visually using the City of Canton water maps.
- The service provider will search for water valves shown, but not identified by visual inspection, using a magnetic locator, probing rods and other tools.
- If the valve cannot be located after searching for twenty minutes, the valve will be identified in the database as "cannot locate" , documented as a work order creating a mapping grade

GPS position at the location where searched and otherwise treated as a standard valve assessment.

- When authorized by the City of Canton Water Department, Cannot Locate (CNL) work orders will be addressed by the service provider by researching legacy data or other documents provided by the Water Department. CNL investigations will be based on available data and billed at the hourly crew rate as agreed with the Water Department.

2.2 Identify the Valve

Each valve will be identified by its corresponding Water Department identification number. In cases where Asset ID's are not available, the service provider will create a temporary asset identification number as agreed to prior to starting the job during the project startup meeting.

2.3 Access the Valve

The valve cover shall be removed by the service provider in order to access the valve. If, after attempting to remove the valve cover it is clear that the cover is "stuck" the cover will be broken, the valve accessed and the cover replaced. Covers are to be provided by the Water Department.

2.4 Clean Out Valve Box/Vault

The service provider will vacuum out debris or pump out water from the box/vault in order to allow access to the valve operating nut. In every case the operating nut must be exposed and clearly visible (not under water or debris) when the valve is exercised. In order to provide this service, the service provider will provide a vacuum and water pump with every work crew. The service provider shall legally dispose of the materials vacuumed out of the valve structures. The valve box must have a minimum of 6" of debris before the service provider can log the valve as being inoperable and log it as a rehabilitated valve.

2.5 Inspection

The service provider will execute a visual inspection of the structure and any valves in vaults. This inspection will be conducted from street level and is intended to discover discrepancies that are readily visible from above ground. The specific inspection information to be documented is noted in the documentation section.

2.6 Exercise the Valve

The service provider will exercise each Large and Critical Valve based on a plan to be submitted for each valve size and type encountered in this program. All valves will be exercised with the minimum torque required so as to minimize the possibility of damaging the valve. All valves shall be operated from full open to full closure a minimum of three (3) times until such time this can be done with no additional turn range improvements or fluctuation in operating torque. Following are some minimum guidelines that shall be followed when closing a valve:

1. Begin with a steady amount of torque in the direction necessary to close the valve, moving through 5 to 10 rotations.
2. Reverse for two or three rotations.
3. Reverse again and rotate 5 to 10 more turns in the closing direction.
4. Repeat this procedure until full closure is attained.
5. Once the valve is fully closed, it shall be opened a few turns so that high velocity water flowing under the gates can move the remainder of the sediment downstream with more force and clear the bottom part of the valve body for seating.

6. Fully close the valve again.

Specific valve exercising guidelines are to be provided by the service provider making note of different sizes and types. Per Canton Ordinance 105.01(e), the valve exercising guidelines will be a factor in determining if the service provider has the lowest and "Best" bid. At a minimum the service provider should include:

- For all butterfly valves: Specific operating procedures, the torque limits and if the valve is stuck, the amount of time the valve is worked each time the torque is increased.
- For all gate valves: Specific operating procedures, the torque limits and if the valve is stuck, the amount of time the valve is worked each time the torque is increased.
- Specific valve exercising equipment by type and manufacturer to be used on each size and type of valve.
- Detailed, written valve exercising processes that will be used by its operating crews that will include, the torque limits and if the valve is stuck, the amount of time the valve is worked each time the torque is increased for every valve type and size anticipated in the scope of this program.
- Notification procedures for any valves found closed or any unsafe conditions that are observed.
- Specific procedures if a bypass valve is in place.

2.7 Listen to the Valve

Once the valve is in the closed position, the service provider shall listen to the valve to determine if it is leaking. Any valve that sounds like it is leaking shall be documented as such.

2.8 Mark the Valve

Valve lid covers will be marked, as the inspection and exercising process is completed, with blue marking paint. The mark is intended to provide field evidence of work completed at an individual valve and will also assist any future crews in locating the valve in a timely manner. Paint is to be provided by the Water Department.

2.9 Minor Valve Repairs

The service provider will complete minor repairs as they are encountered throughout this program if requested by the Water Department for an additional fee. Minor repairs are defined as repairs which can return a valve to full operability and do not require backhoe excavation or breaking the pressure barrier of the water system. While many different repairs may be necessary in order to restore valves to full operability, the service provider is to only complete the minor repairs noted below:

- Raising valve boxes in asphalt
  - Locate the paved over valve, cut asphalt (small cut), jackhammer down to the cover, apply risers to raise to existing street level, backfill with compacted material and patch with cold patch material. Materials (risers and cold patch) are to be provided by the Water Department.
- Raising valve boxes in dirt, grass, sand or gravel
  - Locate the buried valve, dig down to the cover, apply risers to raise to existing ground level, backfill with compacted soil. Materials (risers) are to be provided by the Water Department.
- Re-aligning valve boxes in dirt, grass, sand or gravel

- Locate the misaligned valve and re-adjust misaligned valve boxes to make the valve operable. Alignments will be executed by digging or potholing in dirt, sand, grass or gravel up to 24" in depth (not requiring a backhoe) and re-adjust or replace the valve box as necessary, and backfill with compacted soil or material. Materials (valve boxes, lids) are to be provided by the Water Department.

- Other valve repairs
  - The service provider will provide documented expertise in repairing valves that are accessible in vaults via confined space entry or that are generally accessible without requiring backhoe excavation. These repairs are to be executed at an hourly crew rate as agreed with the Water Department and are intended to return repairable valves to full operability and save the Water Department the cost of replacement. Materials are to be provided by the utility. Valve repairs will include but are not limited to: op nut repair/replace, pinion gear repair/replace, bull gear repair/replace, external shaft replacement, external bushings repair/replace, packing gland repair/replace, bonnet bolt replacement, frozen valve rehabilitation and other repairs that may be necessary and agreed with the Water Department.

2.9.1 Out of Position - Valve Protocol

Out of position valves create unintended dead ends and water quality problems requiring hydrants to be flushed when they are re-opened. The Water Department may choose to review out of position valves and request the Service Provider to open these valves to improve system hydraulics. If directed by the Water Department, designated hydrants shall be flushed. The service provider shall document the hydrant flushing activities and bill on a time basis (hourly crew rate) as agreed with the Water Department.

2.10 Equipment and Software

The service provider agrees to furnish to the Water Department all necessary materials, equipment, labor (unless otherwise noted in this scope of services) to complete the Large and Critical Water Valve Evaluation, Improvement and Information program in accordance with the provisions, instructions and specifications for the Water Department. The service provider must use a microprocessor controlled valve turner with a torque limit of 750 ft. lb. with the capability to assure that all Large and Critical Valves 12" and larger can be safely operated. The service provider will use an industrial vacuum with at least a 12 cu. ft. holding capacity and water pump with a minimum pumping capacity of 100 GPM. The service provider will list proposed software and hardware systems below in response to this solicitation:

Currently the Water Department uses ESRI ArcCatalog 10.0 to manage its database. Coordinate data shall be field collected with autonomous GPS readings and subsequently differentially corrected via post-processing. The service provider shall further refine positions through filtering and inspection to eliminate noise, problematic satellite geometry and multi-path degradation. Point valve features shall be collected at an epoch of 1 second with a minimum occupation of 30 seconds. Specific parameters include;
