APPENDIX ___

PROJECT SIGN

The Contractor shall supply, install, and maintain, where directed, two (2) project signs. The signs shall be four (4) foot by eight (8) foot; painted white with black letters, similar to the sign as shown above. The signs to be installed at the direction of the Engineer.

The sign board shall be constructed of 3/4" exterior plywood, as a minimum. The sign board shall be coated with a material compatible for exterior use and compatible for the lettering of the sign. Lettering of the sign to be a paint or decal application.

Sign shall be mounted using as a minimum (2) 4' x 4', wood post, at a quality and strength for desired application. Wood post shall be a minimum 10' length. The length of bury shall be determined in the the field.

The Contractor shall provide and install, proper bracing – kickbacks for adequate strength and lateral resistance.

Payment for the performance of this work shall be included in the price of the contract, including subsequent removal when directed by the Engineer. No separate payment is to be made.

OHIO PUBLIC WORKS COMMISSION

Standardized Signage Guidelines and Layout

Attached is the standardized art work for signage on OPWC assisted projects. This layout is to be used on all OPWC projects in which project signage is posted. The purpose of the standardized layout is to increase public awareness through signage repetition. Guidelines and a breakdown of the layout are as follows:

GUIDELINES

1. All OPWC projects using signage will follow the attached standardized layout with the exception of projects jointly funded with other state or federal funding agencies which have other signage requirements.

LAYOUT

1. The standardized layout is designed for a 8' x 4' sign divided into three sections.
 - a. The top section is designated for the State of Ohio graphic screen with The Ohio Public Works Commission screened over as specified on the attached.
 - b. The middle section will include the project name with the total project cost listed below it.
 - c. The lower section is designated for local project information such as state and local officials, contractors, consultants, or other information pertinent to the project.
2. Color specifications include a 10% screen of Pantone Matching System 548 dark blue for the State of Ohio Graphic, Pantone Matching System 548 dark blue for the Ohio Public Works Commission, project name, and total project cost. Black will be used for the box around the project name, total project cost, and local project information.

Questions concerning the above information can be answered by an OPWC Program Representative. Call (614) 466-0880.
